Based on due diligence and RCOI investigation results, the Company conducts risk level assessments for its suppliers. For high-risk suppliers, the Company requires them to complete RMAP ce r ifcation for non-compliant SORs within the speci f ed timeframe or remove them from the supply chain. Moreover, the Company provides specialized guidance and conducts social responsibility audits that include con f ict mineral evaluation criteria. It continuously tracks, assesses, and veri f es their SORs ce r ifcation and mineral traceability processes until all SORs in the supply chain meet the required standards, at which point the case is cl ' seh se 1 in ireh ɤ =
